## Researching and Sharing the Health Benefits of Tea

Demonstrating and Promoting the Value of Green Tea Through Strengthened Industry-Government-Academia Collaboration

The Central Research Institute was established in 1986. In recent years, we have promoted research through industry-government-academia collaboration to scientifically demonstrate both the health and functional benefits of green tea, such as the effects of catechins and theanine, as well as its emotional value, including the effects of its aroma and as a catalyst for social communication.

#### **Research Through Industry, Government and Academia Partnerships**

#### Launch of Joint Research with the Center for iPS Cell Research and Application at Kyoto University

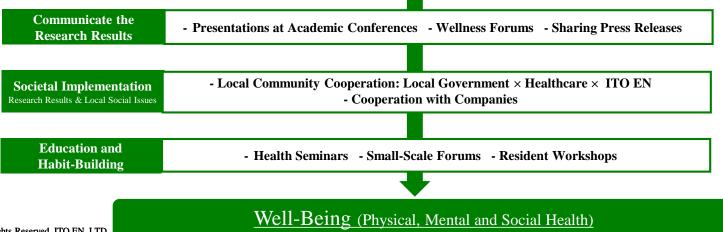

#### **Central Research Institute**

We have launched an industry-academia joint research project aimed at pioneering next-generation food science and industry by developing methods to verify the efficacy and safety of green tea and its components without animal testing, using technology from the Center for iPS Cell Research and Application at Kyoto University. We aim to verify whether human iPS cells and organoids can serve as alternatives to animal testing, ultimately working toward the establishment of new research methods that fully replace animal experimentation.

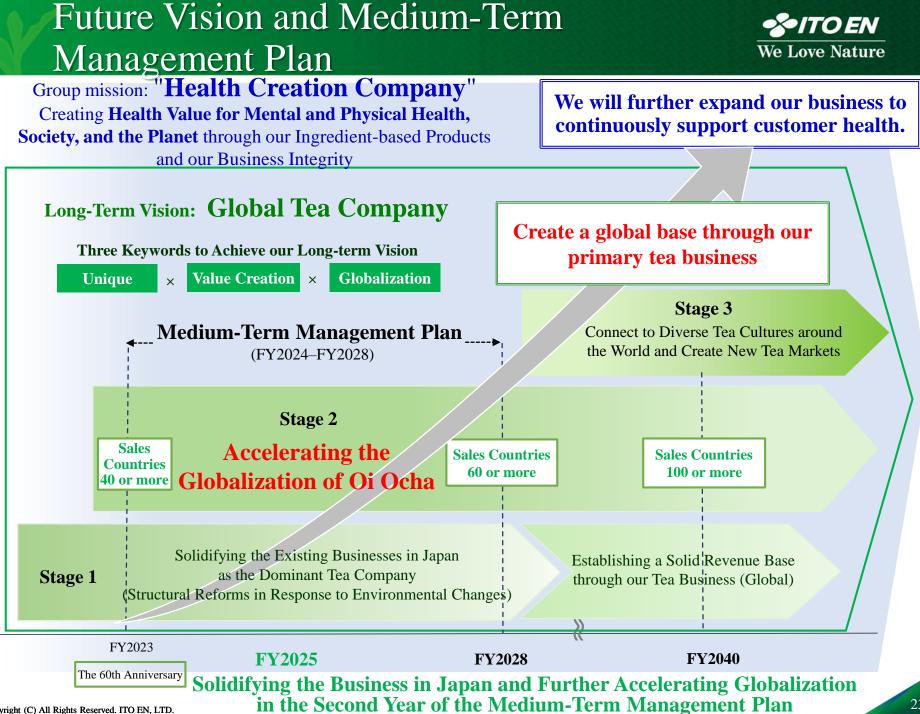

#### Launch of Joint Research on Sleep and Mental Health for Officer Workers at TAKANAWA GATEWAY CITY

The project aims to deepen understanding of the relationship between green tea drinking habits and work engagement, health awareness, sleep, and mental health, and to demonstrate the mindful mind-reset effects of "tea ingredients" and "tea time". \*Collaborative research partner: ACCEL Stars Inc. (a start-up company from the University of Tokyo Graduate School of Medicine)

# Sustainable Agricultural Initiatives

#### Current State of Tea Farming

#### **Decline in Domestic Crude Tea production and Tea Cultivation Area**

#### "The Tea-Producing Region Development Project," Our Unique Sustainable Agriculture Model

#### ITO EN Handles about 25% of Crude Tea

ITO EN handles about 25% of the crude tea produced domestically, sourcing via **The Tea-Producing Region Development Project** and direct **Market Purchases**, where procurement supervisors inspect quality firsthand.

## Market Purchases

The Tea-Producing Region Development Project

- Encompasses Cultivation under Contract - New Tea Plantations Business

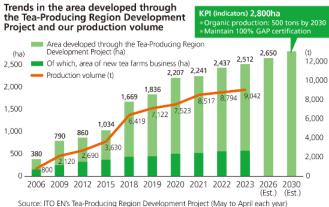

The Tea-Producing Region Development Project -> Increasing Tea Farming Employment and Ensuring Stable Operations through Full-volume Purchasing

- Encompasses Cultivation under Contract: Have Existing Farmers Commit to Producing Tea Leaves for ITO EN
- New Tea Plantations Business:

Have Local Governments Create New Tea Plantations from Overgrown Fields for the Production of Tea Leaves for ITO EN

## Applying the Tea-Producing Region Development Project in More Areas

## Expand the Tea-Producing Region Development Project in Response to the Decline in Tea Production and Tea Cultivation Area

New tea farms business districts (Expanded to nine districts in seven prefectures as of FY4/2024) Five prefectures in Kyushu Shizuoka (Oita, Miyazaki, Kagoshima, Saga and Nagasaki) Usa district Tara -Kitsuki district district -Usuki district ikuro Saikaidistrict district Saitama (expansion started in April 2022) -Miyakonojo district oo district Iruma district Total of the Tea-Producing Region Development

#### Project in FY4/2024: 2,512 ha (Of which, new tea farms: 500 ha or more)

(Of which, new tea farms: 500 ha or more

Increased production ingredients ratio from the Tea-Producing Region Development Project to total crude tea handling volume

## FY4/2015 16 ↔ FY4/2024 more than 50

## Reduction in environmental impact and expansion of overseas business

#### **Actively Promote Agriculture DX**

- Digitize Expertise Gained through Years of Experience, such as Identifying Optimal Harvest Timing and Fertilizer Application, Passing on Tea Production to the Next Generation
- Compliance with GAP and Organic Certifications, and Efforts to Reduce Environmental Impact

#### 🛎 agri-note.

Commercial Farming Support Tool "agri-note"

A commercial farming support tool accessed through a computer or smartphone to record, aggregate, or download information related to commercial farming The tool increases efficiency in areas such as management of pesticide usage history and compliance with GAP certification requirements.

System for Determining Compliance with Pesticide Regulatory Requirements A unique system to quickly determine whether green tea raw material produced for overseas markets complies with the pesticide regulatory requirements of each country.
