## Major Factors Impacting Consolidated Operating Income for FY2025 3Q

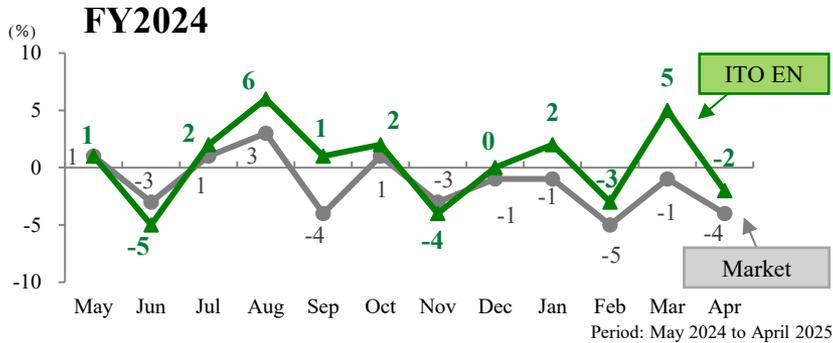

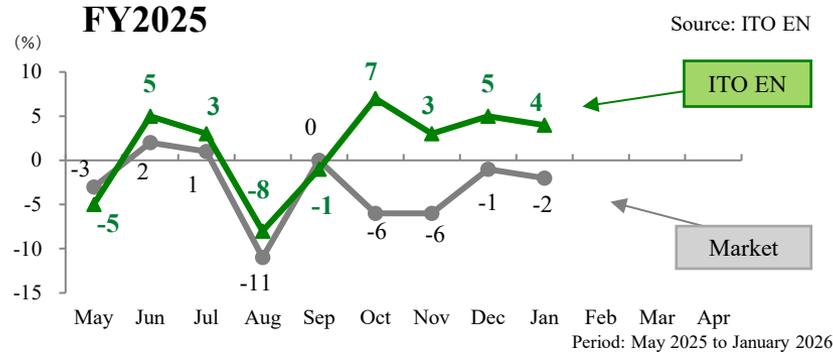

### Supplement to Factors of Changes in Non-Consolidated Results of ITO EN

- Impact of increase in sales +1.9
- Changes in container mix, product mix, etc. +1.3
- Impact of higher prices of raw materials and materials, etc. -6.8
- Impact of reduction of advertising and promotional expenses, etc. +1.6

# Domestic Environments and ITO EN

## Monthly Sales Volume Trends

## Beverage Market Environment Topics

- Aug. In addition to high prices and the intense heat, several negative factors coincided, including a reversal of earthquake-driven stockpiling from the previous year and a reduced number of operating days.
- Sep. The intense heat eased, creating moderate thirst-quenching demand. On the other hand, due to rising prices, large PET bottles and the water and tea categories underperformed.
- Oct. Although low temperatures contributed to strong performance in hot beverages, the positive effect was almost offset by the negative impact of industry-wide price increases.
- Nov. New products performed steadily, but the overall market remained negative following October due to impacts from competitors' cyberattacks and other factors.
- Dec. Year-end demand exceeded expectations due to the extended year-end and New Year holidays.
- Jan. Low rainfall encouraged outdoor drinking. Aggressive marketing by multiple brands also contributed, boosting overall sales.
